

Jack Degelman

Along with his four siblings, Jack represents a second generation at Degelman Industries Ltd – a farm implement manufacturing business.

Upon graduating from the Faculty of Administration at the University of Regina, with a major in marketing, he started his career at Degelman Industries in 1979. He began in research & development and soon after, joined the marketing department. In 1985, he was promoted to Marketing Manager and was responsible for all sales, distribution and promotional activities, both in North America and abroad.

He has also farmed most of his life with Degelman Farms Ltd, a grain operation near Raymore, Saskatchewan, where the farm also serves as the main testing grounds for new products developed at the company.

He shared the Presidency of the organization with his brother Paul for several years before eventually selling the majority shares to WestCap in Saskatoon.

Now, taking a step back from day-to-day operations of the organization, he serves in a new role as a board member of the new Degelman Industries LP.

He has served on the MDL Real Estate Fund advisory board, spent 10 years on the board with the Royal Regina Golf Club as well as serving Agricultural Manufacturers of Canada (AMC), and former Prairie Implement Manufacturing Association (PIMA).

In 1975 he began flying with the Regina Flying Club and has been an avid aviation enthusiast ever since. Today, he still flies throughout Canada and the USA as an instrument rated pilot.

He and his wife Mary proudly share two daughters (Danielle and Michelle), one son-in-law (Danny), and two wonderful grandsons (Zachary and Jaxon)
